EMPLOYMENT, CONFIDENTIAL INFORMATION AND INVENTION ASSIGNMENT AGREEMENT," which is attached for your reference as Exhibit A.

Section 8 of said agreement provides:

Ownership of Company Inventions; License of Prior Inventions. I hereby assign and agree to assign to the Company or its designee, my entire right, title, and interest in and to all Inventions ("Company Inventions") and any associated intellectual property rights which I may solely or jointly conceive, develop

or reduce to practice during the period of my employment with the Company (a) which relate at the time of conception or reduction to practice of the invention to the Company's business or actual or demonstrably anticipated research or development, or (b) which were developed on any amount of the Company's time or with the use of any of the Company's equipment, supplies, facilities or trade secret information, or (c) which resulted from any work I performed for the Company. I hereby agree promptly to disclose and describe to the Company any and all potentially patentable Company Inventions. I agree to grant the Company or its designees a royalty free, irrevocable, worldwide license (with rights to sublicense through multiple tiers of distribution) to practice all applicable patent, copyright and other intellectual property rights relating to any Prior Inventions which I incorporate, or permit to be incorporated, in any Company Inventions without the prior written consent of the Company. Notwithstanding the foregoing, I agree that I will not incorporate, or permit to be incorporated, such Prior Inventions in any Company Inventions without Company's prior written consent.

Section 11 of said agreement provides:

Cooperation in Perfecting Rights to Inventions.

(a) I agree to perform, during and after my employment, all acts deemed necessary or desirable by the Company to permit and assist it, at its expense, in obtaining and enforcing the full benefits, enjoyment, rights and title throughout the world in the Inventions hereby assigned to the Company. Such acts may include, but are not limited to, execution of documents and assistance or cooperation in the registration and enforcement of applicable patents, copyrights, maskworks or other legal proceedings.

(b) In the event that the Company is unable after reasonable efforts to secure my signature to any document required to apply for or execute any patent, copyright, maskwork or other applications with respect to any Company Inventions (including improvements, renewals, extensions, continuations, divisions, or continuations in part thereof), I hereby irrevocably designate and appoint the Company and its duly authorized officers and agents as my agents and attorneys-in-fact to act for and on my behalf to execute and file any such application and to do all other lawfully permitted acts to further the prosecution and issuance of patents, copyrights, maskworks or other rights thereon with the same legal force and effect as if executed by me.
